## About Me

Dedicated backend software engineer with 2+ years of experience in technologies like Java, SpringBoot, Hibernate, SQL, REST etc. Familiarity with agile terminologies. Worked on backend/middleware application improving response time of services and maintaining standard coding practices.

---

## Work Experience

### Medline Industries India

Senior Associate Java Developer (Zendesk, Pricing)

July 2023 – Present

Pune, India

- Pitched and executed modernisation initiative
  - Transitioning services from monolithic architecture to **micro-services** architecture
  - Reducing response time of middleware services from **10+ seconds to 1-3 seconds**
- Collaborated closely with cross-functional teams like API-gateway, network ops to ensure seamless integration and functionality with org and zendesk environment
- Played a crucial role in the pricing project by collaborating with the pricing development team on various Spring Boot micro-services, incorporating multiple Spring Batch implementations for efficient and reliable data processing
- Created a java utility for manual QA team to convert test case excel to Jira template
- Created a Java GraalVM utility for Zendesk admins to create user audit with pluggable configuration JSON saving hours of manual user audit check

### Associate Java Developer (Zendesk)

November 2021 – July 2023

- Understood and implemented middleware java services for Zendesk application
- Contributed on a React and Spring Boot stack for an internal tool for onboarding new joiners in the org

## Skills

- **Skills:** Java 8+, Spring Boot, Hibernate, Spring Batch, MySQL, Shell Scripting, React, Golang

## Education
